SUMMARY

Passionate software enthusiast with expertise in AI/ML, Data Science, and Web Development. Constantly exploring innovative technologies and developing solutions to real-world problems.

SKILLS

Programming Languages	JavaScript, Python, HTML, CSS
Web Technologies	Flask, Tailwind CSS, Vite
AI/ML Technologies	Machine learning algorithms, Deep learning
Core Skills	DSA, Problem Solving, Debugging
Soft Skills	Strategic Thinking, Creativity, Communication

PROJECTS

MNIST Digit Classification | *Neural Networks* | *NumPy*

[Source Code](#)

- Developed a two-layer neural network from scratch using NumPy to classify handwritten digits from the MNIST dataset without using deep learning frameworks.
- Implemented the complete forward and backward propagation pipeline, including ReLU activation, Softmax classification, one-hot encoding, and gradient descent optimization.
- Built a custom training and prediction workflow with random parameter initialization, validation split, accuracy evaluation, and digit visualization using Matplotlib.

STUCET – EAPCET Papers Hub | *Web Development* | *Supabase*

[Source Code](#)

- Developed a community-driven platform for organizing EAPCET question papers by state, year, date, and shift, with direct access to Google Drive resources.
- Integrated Supabase (PostgreSQL) for persistent storage, enabling students to submit question papers through a form and dynamically retrieve community-contributed content.
- Built and deployed a fully responsive web application using HTML, CSS, and Vanilla JavaScript with Vercel, supporting seamless access across desktop and mobile devices.

WORK EXPERIENCE

Web Development Intern | Hack Culprit Technologies

July 2026 – Present

- Contributing to web development projects as a Web Development Intern, applying practical development skills to build and improve web-based applications.
- Collaborating on real-world development tasks while gaining hands-on experience with web technologies, software development workflows, and project implementation.

Campus Ambassador | NIMBLUX

August 2026 – Present

- Representing NIMBLUX on campus, promoting its initiatives and connecting students with relevant opportunities and activities.
- Supporting student outreach and community engagement while developing communication, networking, and leadership skills.

Student Volunteer / Event Support | DataHack Summit

2026

- Supported session operations, attendee coordination, and technical community engagement during the national summit.

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML)	2024 – Present
Krishna Chaitanya Institute of Technology and Sciences	Currently Pursuing
Intermediate BIEAP at CLR Junior College	2019 – 2021
Marks: 789/1000	
Class 10th BSEAP at Krupaamrutha High School	2018 – 2019
Marks: 552/600	

CERTIFICATIONS

• Responsive Web Design FreeCodeCamp	View
• Python HackerRank	View
